

DOUBLE WALL TRAILERS

990 GALLONS

FULLY COMPLIANT FOR BULK FUEL

The DW offers 110% containment and is fully compliant with the EPA's Spill Prevention, Containment, and Countermeasures (SPCC) Program as well as USDOT 406 regulations for the transportation of gasoline and other low flashpoint fuels and flammable liquids on public roadways.

Like all Thunder Creek trailers, Double Wall Trailers are built to travel smoothly at highway speeds and stand up in the toughest environments.

The rear utility box model can be equipped to function as an on-site shop on wheels. Utility Box options include a grease system, a variety of toolboxes and utility appliances such as compressors, generators and welders.

An ISO 22241 Compliant DEF Delivery System can be added in the front enclosure at any time. This system utilizes Thunder Creek's exclusive 2-in-1 DEF Pumping System to handle DEF in a closed path to maintain purity to off-road machines.
